QuadraRack® with Bonding, Power, and Cable Management

Key Features:

- Stability and strength of an enclosure in an open mounting system
- Provides easy access to equipment and cabling
- Quick assembly with one-piece top and bottom pan sets
- Easy to bay together to create multi-frame configurations
- Use with any CPI Cabling Section to manage cables
- Support large equipment on heavy-duty four-post fixed and sliding shelves

Basic Vertical Mount Power Strip (12848-705)

Basic Vertical Power Strips provide 24 NEMA 5-20R T-slot receptacles to provide reliable power distribution to network equipment. All units include breakers for overcurrent protection. Models with surge protection and current monitoring are also available.

Evolution® g2 Double-Sided Vertical Cable Manager (35521-703)

CPI Evolution® Cable Management provides an engineered solution for managing high-density cabling applications on open two-post and four-post CPI Rack Systems, delivering increased performance to match the demands of data center applications.

Rack Bonding Jumper Kit (40159-008)

Rack Bonding Jumper Kits serve as a rack bonding conductor for CPI's Universal and Standard Racks. CPI's Universal Racks include a location for attaching the Rack Bonding Jumper Kit inside the rack's vertical equipment mounting channel. Order additional hardware as required to secure the other end of the jumper to the telecommunications equipment bonding conductor or directly to a telecommunications bonding busbar. Available individually or in packages of 10.

Adjustable Cable Runway (14300-718)

Adjustable Cable Runway is designed to provide a flexible point-to-point solution anywhere cables enter or exit the cable pathway. It features movable Cross Members for ultimate cable pathway customization and supports cable and fiber from floors, ceilings, walls and the tops of cabinets and racks.

Uninterruptible Power Supply (VL2200A)

Reliable and economical backup power protection for servers and network applications.
