FEATURES:

■ Add cable fill capacity to any existing CPI Cable Distribution Spool (ref. p/n 15002-00x and 15003-00x). This device increases the 2" Diameter end flange to 3" in diameter.

■ Quickly and easily attaches to the existing Cable Distribution Spool without the use of any tools. The Cable Spool Adapter Flange snaps, twists, and locks into a set of pre-existing slots on CPI's Cable Distribution Spools.

■ Can be added to products that include Cable Distribution Spools including the 12100 Series and 12101 Series Cable Runway Radius Drops and the 13070-x19 Horizontal Wire Management Panel.

Adapter Flange

The Adapter Flange is the latest enhancement to CPI's CatRack™ Wire Management System. It accommodates moves, adds, and changes to your network cabling by doubling the cable management capacity of any existing CPI Cable Distribution Spool. Many customers use Cable Distribution Spools on racks and wallboards to create smooth vertical to horizontal transitions for the patch cords and jumper cables that connect network hardware. The flange attaches to the spool without the use of any tools with a simple snap, twist, and click. Add a flange to either spool (ref. p/n 15002-00x or 15003-00x), the Cable Runway Cross-Member Radius Drop (ref. p/n 12100-xxx), the Cable Runway Stringer Radius Drop (ref. p/n 12101-xxx), or the 19" Horizontal Wire Management Panel (ref. p/n 13070-x19).

Expand your cable management potential with CPI Style. Please contact your local authorized CPI Distributor or CPI Customer Service Representative for more information.

Specifications:

■ Attaches to 4" deep Cable Distribution Spool (15002-00x) or 1.5" deep Cable Distribution Spool (15003-00x).
■ Available in a black or white finish.
■ Manufactured from flame retardant composite material.
■ Available individually or in boxes of 100.
