One Part Number = One Package = One Total Solution
The Global Standard Pack

Combining CPI's new
Global Vertical Cabling Section
plus improved
Standard Rack

Save time and money with The Global Standard, combining CPI's industry-leading Standard Rack with the easy-to-use, cost-effective Global Vertical Cabling Section (GVCS). Get one convenient package —at a **savings of up to 28%.**

Benefits:

- **Comply with industry standards.** UL Listed rack complies with industry safety standards and bid specifications. In addition, CPI's composite cable management fingers meet various requirements, including EIA/TIA bend radius and UL 94V-0 fire rating.

- **Save time, minimize errors.** RMU markings on rack simplify equipment installation, so you can specify mounting locations without measuring or counting holes.

- **Stay aligned.** Patented cable guide fingers spaced at 1 RMU intervals create seamless cable transitions from your rack-mount equipment.

- **Hide and secure cables.** A sturdy snap-on, hinged cover is included for each cabling section, resulting in a closed, finished appearance.

- **Customize your installation.** Choose between packages with 3.65"W or 6"W cabling sections. Two cabling sections can be used either on both sides of the rack or installed back-to-back for a double-sided system. Cabling sections have seven 2.5"-diameter pass-through ports. Add more vertical and horizontal cabling sections to suit your needs.

Part Number	Package	Shipping Weight
57001-X03	One 19"W x 7'H Standard Rack One 3.65"W x 7'H GVCS One Rack Installation Kit for Concrete Floor	50 lb
