

Enhance Your Services

Join Chatsworth Products' Select Partner Alliance

Chatsworth Products (CPI) would like you to consider entering into an exclusive agreement to be part of our Select Partner Alliance. Select Partners are chosen for their commitment to customer care and reputation for integrity, as well as the desire to identify and find the best solution to customer problems. As a Select Partner, you will represent our premium power product, eConnect®, a family of rack-mount intelligent power distribution units (PDUs), as part of your solution.

eConnect PDUs solve the growing problem of extending reliable, high-density power distribution, measurement and control into the rack and down to the device level. Powering today's compute environment is much more challenging than it was a few years ago. Consolidation and virtualization have concentrated more compute in each cabinet, and made each piece of equipment more highly utilized and critical. This adds up to higher power densities in each rack.

Additionally, the amount of power used by devices varies. Instrumentation at the rack to monitor and alert alarm conditions, to prevent the powering of unauthorized equipment and to track performance for record keeping, billing and system optimization, is critical. eConnect PDUs fill the need with six progressive functionality levels available in a wide range of power configurations to match your customers' requirements.

CPI eConnect PDUs offer the following advantages:

- A market-leading 149°F (65°C) ambient temperature rating for use in all hot aisles
- High-value Redundancy Pack option, including a pair of Black and Glacier White PDUs to easily identify the A and B power feeds
- Secure Array® IP Consolidation technology, which delivers the lowest networking costs, connecting up to 48 PDUs through a single network connection and IP address
- Integration with RFID Electronic Locks, allowing users to power and network locks through the PDU
- Made in the United States, TAA-compliant
- Plus, locking outlets, phase-balance outlets, field-replaceable controller, and attachable sensors and electronic locks

CPI power solutions will meet or exceed your customers' expectations.

Why Choose CPI?

Partnership with CPI offers the following benefits:

- ✓ A wide range of product solutions to match customer needs
 - More than 350 standard eConnect PDU plug/outlet configurations over six functionality levels
 - Equipment cabinets configured for server, storage or networking applications
- ✓ Kitting for easy ordering – Create a complete solution for your customer and order under a single part number.
- ✓ Factory installation – CPI will ship PDUs and other accessories preinstalled in cabinets, assuring compatibility, saving your customer time and reducing packaging and logistics concerns.
- ✓ Rapid product development – CPI can modify certain products to fit specific applications; we staff an applications engineering department for this specific purpose and manufacture custom products every workday.
- ✓ Field Sales Support – CPI provides localized support through power sales engineers and regional sales managers who are available to help with technical questions and project registration.
- ✓ Less channel competition – CPI maintains a small, focused channel with a limited number of stocking distributors, resellers and select partners. We do not sell direct. Our sales force and website support channel fulfillment.
- ✓ Price and deal protection – Our project registration process provides deal protection, so you don't compete with other CPI channels; you find and work the deal, so you can get the sale.
- ✓ U.S. manufacturing – CPI employee owners, with established quality management systems, staff our regionally located facilities, delivering high-quality products with competitive lead times.
- ✓ Strong product warranty and responsive customer service – CPI offers a 3-year standard warranty and optional 2-year extended warranty on all CPI-branded products, advanced replacement on PDUs and responsive customer service that can help you with any questions about orders, pricing, shipment, delivery or warranties.

Industry Leadership

CPI's reputation in power began in the early 1990s, when the company moved forward with its mission to provide a complete solution to protect and power technology investments to customers worldwide.

1992

One year after being formed, CPI introduces a power product line to its offering.

2012

CPI introduces eConnect® PDUs as a new generation of power management solutions for enterprise data centers, featuring the highest ambient temperature rating in the industry.

2009

CPI acquires Epicenter. With the integration of Epicenter's technology and power expertise, CPI further addresses customer needs with one of the most comprehensive data center power hardware and software solutions sets in the market.

2019

CPI opens a new facility—the Electronics & Software Technology Center—in Round Rock, Texas, focused on technology development, customization and production of the eConnect line of intelligent power management solutions.

2020

CPI launches the full lineup of its next-generation eConnect PDUs.

Take advantage of CPI's power expertise and innovation.

Featured Product Solutions

Add power. Make it easy.

eConnect PDUs

eConnect PDUs provide the ultimate solution for combining cabinet-level power management, environmental monitoring and electronic access control in multitenant and enterprise data centers. With innovative capabilities such as Secure Array IP Consolidation, integrated RFID Electronic Lock Kits and the ability to ship preinstalled in CPI cabinets, eConnect PDUs offer the quickest and lowest cost deployment among all intelligent rack PDU solutions in the industry.

GF-Series GlobalFrame® Gen 2 Cabinet System

GF-Series GlobalFrame® Gen 2 Cabinet System is an industry-standard server and network equipment storage solution for data centers, computer rooms or network facilities. A full line of thermal and cable management accessories are available. GlobalFrame with Vertical Exhaust Ducts support CPI Passive Cooling®, a recommended energy efficiency best thermal management practice.

+ power

Powerful Combination: Power + Cabinet (we call it +Power)

Order the solutions under one part number with accessories and PDUs already installed. Easier ordering, shipping and less packaging.

Just want a PDU?

The CPI Power Selector makes it easy!

To Get Started

1. Determine basic PDU requirements: the inlet plug type, the minimum number and type of outlets and the required functionality level. Visit our online CPI Power Selector to find an exact part number.
2. Determine basic cabinet requirements: the number of rack-mount spaces, minimum usable depth and airflow pattern.
3. Contact a CPI Power Sales Specialist for configuration assistance, to get a quote or place an order.

Make Smart Choices Quickly

PDU selection is made easy with CPI's Power Selector, a free and easy-to-use online software tool available on selectapdu.com. The Power Selector enables you to select the best power product for your application by narrowing down options based on your requirements. After you're done comparing, you can email or print the results.

“When facing a demanding target date, I am extremely grateful that we have vendors (partners) ready, willing and able to adopt our client’s sense of urgency and expeditious nature of the job. Simply put, a five-day turnaround for this setup was remarkable!”

Rich Rogers, Data Center Manager, OneNeck® IT Solutions

About CPI

CPI, a 100-percent employee-owned company, is a global manufacturer of products and solutions that power and protect your ever-growing investment in information and communications technology for IT and industrial automation applications. CPI is well positioned to provide you with unequaled application expertise, customer service and technical support, and a global network of industry-leading distributors. Employee owners are committed to a philosophy of quality through teamwork, caring and commitment, which are extended to customers through our solutions and services.

While every effort has been made to ensure the accuracy of all information, CPI does not accept liability for any errors or omissions and reserves the right to change information and descriptions of listed services and products.
